

About us...

Pee Kay Silent Generators Pvt. Ltd. is a established supplier, installer manufacturer and service provider of Electric/Industrial & Automation panels and solutions in India. Its diverse product range covers **Main LT Panel (PCC)**, **Automatic Power Factor Correction (APFC) Panel**, **Power Distribution Panel**, Motor Control Center Panel (MCC), AC/DC Drive Panel, Soft starter Panel, PLC Panel, **Auto Mains Failure (AMF) Panel**, Synchronizing Panel, Instrument Panel, Fire Fighting Panel, Outdoor Panel, Software development (SCADA,PLC,HMI) and services.

In order to develop our products and services, the new-blood engineer team has been well-trained to satisfy the fast-growing demanding customers. With our technical know-how and capability, our intention is to integrate technology and provide high technology. We are pleased to meet any requirements of our value customers from our technical expertise to design, installation, commissioning, maintenance, and distribute the hi-technology. We also devote trust-working and after-sale service, including transferring of our knowledge and experience passing on to our clients.

PROJECTS PKSGPL has a strong projects division to handle large turnkey projects involving installation, commissioning and maintenance. It has nationwide sales and service network and widespread logistic support. It has a well-established repair center equipped with all modern diagnostic and repair tools.

TECHNOLOGY PKSGPL has a well-equipped product design facility including Panel designing in AUTO CAD, E-CAD, fabrication workshop with latest machines, healthy environment and test facility. The company always immerse him self and ready to take new technologies for developing our products.

SOFTWARE DIVISION PKSGPL software division offers consultancy and outsourced services in customized projects in various products like PLC, HMI, SCADA, Servo embedded software, Industrial networking (MODBUS,PROFIBUS,ETHERNET) etc.

Our services...

SERVICE, MAINTENANCE & CUSTOMER RELATIONSHIPS

Pee Kay Silent Generators Pvt. Ltd. Customer Services Group is established as part of its dedication and commitment to meeting the after sales support' requirements of the customer. The Group provides a comprehensive range of support services covering both the Advance Power Technologies product range and third party supplied equipment and packages. The services available encompass all activities that may be required after system delivery and can be provided to any location nation-wide. All of the services offered by PKSGPL are backed up by team of qualified, fully trained and dedicated team of installation, commissioning, and support engineers. Similarly the Spares and Services team will cater for all spares parts and service needs. The ranges of services offered by PKSGPL include:

- Site commissioning, testing.
- Site assistance during system hand-over phase.
- End User training.
- Spares parts management and support.
- Maintenance, Servicing, Testing of Switchgears.
- Annual maintenance contracts.

We believe in long term business relationship. Our ultimate aim is to satisfy our clients with our services. We do not compromise with the quality, genuineness and workmanship which leaves a permanent impact on our customers and invariably they recommended our services . We want to develop professionalism in the field.

The combination of vision, innovation, precision & man-power has made us strong. Our customers appreciate our solid reliability & proverbial flexibility when it comes down to supplying even the most complicated solutions economically & on schedule.

Our products...

Power Control Centre (PCC) / Main LT Panel

We offer PCC panels (power control centre panel) which are used for diverse industrial applications and provide reliable and effective service. These panels are manufactured as client's specifications and requirements which very well meet with the industry demands. These control panels are fabricated so that these deliver long lasting service at cost effective prices and even do not demand maintenance.

Auto Mains Failure (AMF) Panel

Our organization is engaged in manufacturing top quality AMF control panels. These panels are available in various models and sizes as per clients' specifications. Use of quality raw material makes them cost efficient and ensure long life of the AMF panel. The AMF panels that we manufacture helps to start the generator in case of mains failure. It immediately gets the power back without any attended and loss of work. Load is transferred from mains to the generator.

Power Distribution equipments/Power Distribution Board (PDB)

Power Distribution Equipments or Power Distribution Board is used for Electrical Power Distribution. In this ACB, MCCB, SDF, MCB etc are the main equipments. This receives supply from PCC. Power distribution board offers isolation and short circuit as basic protections. Other protections like over current, earth fault, earth leakage etc are offered on case to case basis.

Our products...

Motor Control Centre (MCC) Panel

The MCC panel offered by us is widely demanded by various industries for distribution of power, main incoming and motor control panels. These are ergonomically designed with draw out and non draw out type. Further, the designing is also done depending upon the type of application and the customer's requirements.

AC / DC Drive Panel

We are engaged in manufacturing and supplying of variable frequency drive (VFD) panels can be adjusted according to the speed of the motor required in all the process industries and machinery manufacturers. These can be used as energy saving device for some of the machines to save power during no load or it is used as final control element of the closed loop control application where the speed of the motor is changed to control one parameter. The open loop control application is provided with manual speed control of the motors.

Automatic Power Factor Correction (APFC) Panel

For the purpose of power correction and prevention of loss of energy, we provide a highly efficient range of Automatic Power Factor Correction (APFC) Panel. These are imperative to a large number of machine that have inductive features like motors and other large machine. The panel is manufactured from premium quality material and is capable of handling small & large load for correction of power factor through the application of capacitors.

Our products...

Soft Starter Panel

We supply qualitative LV Soft Starter panels that are used to eliminate the high inrush current and start-up torque on every start. LV Soft Starter panels, offered by us, provide starting parameters that increase the life of heavy-duty compressor & blower, ID/FD, fans, chillers, coolers and pumps. We use premium electrical components, compressors, motors and allied material for the fabrication process. The soft starter panels are incorporating with motor protection device/relay as RS 485 communicable with overload, under current ground fault current imbalance over temperature package.

PLC Based Panel

We are one of the successful name as PLC Control Panel Manufacturers. We manufacture superb quality PLC Panel such as Electric PLC Panel. Our PLC Control Panel is programmable logic controller which is widely used for industrial process automation. Our PLC Control Panel is designed for dedicated controller projects or as part of a larger networked system.

Synchronization Panel

We specialize in offering an all-inclusive range of synchronizing panels. Our user friendly and easy to keep up panels can be expanded as per the requirements due to their flexibility. Our panels are integral with electrical governor system with the differences in voltage, frequency and phase angle set between grid and

genets.

Our products...

Instrumentation Panel

We are engaged in the Manufacturing and Supplying of Instrumentation Panels for operation of Instruments like Temperature, Level, Flow, Pressure application and so on. The range of Instrumentation Panels consists of temperature application controlled using PID, Thyristor, SSR. The Instrumentation Panel comes with necessary wiring and Process Indicators like pH, ORP, Pressure, Temperature, Flow etc.

Fire Fighting Panel

We offer fire fighting panels that are extensively used in various industries such as plastic, chemical, pharmaceutical and various refineries. The fire fighting panel is the heart of the fire system and are designed by us using advanced technology. Known for reliability and durability, our range is available in different specifications to

meet varied needs of clients.

Out Door Panel

We bring to our clients a range of outdoor/ open space panels, that are manufactured using best grade raw material. Designed using advanced technology, these panels can accommodate all electrical circuit breaker, pump controllers, lighting switches, stabilizers, ups systems, etc. Our range of outdoor panel is widely appreciated for its sturdy construction, resistance to corrosion and are water & weather proof. Further, these outdoor panel are available in different specifications to meet the diverse needs of clients.
